DEADLY ENEMY OF LEAF HOPPER

(Continued from page one).

ing entire head, body and every other member well defined and perfect. Under the microscope, an ordinary ant looks enormous beside this wee, transparent yellow body with its comparatively big eyes. Every phase of the manner of its attack on the leaf hopper was shown. The hopper lays its eggs by the myriads along the cane leaves and these when hatched out attack the leaves to their destruction. But it is to destroy the eggs that the new parasite has for its one mission in life. It lays its eggs inside the eggs of the leaf hopper. The parasite approaches an egg cluster which some proud leaf hopper parent has deposited, feels them rapidly over with her antennae and then "stings" them, thus depositing her own egg inside. It has been observed by the scientists at the station that the parasite, after feeling over an egg, knows a once whether it has been previously "stung" or not and if it has, passes on.

In the next stage shown, the transparent egg of the leaf-hopper becomes a cloudy red and it can be plainly seen that the infinitely minute young parasite is making trouble. It is living on the contents of the egg in which it has been deposited and under the high power lenses used the whole contents can be seen twisting and turning about. Then in a comparatively short time the egg breaks and there emerges, not a young leaf hopper to prey on the sugar cane, but a young parasite to prey on more leaf hoppers. This wonderful exposition of the way of nature absorbed the planters and it was with difficulty that they could be persuaded to leave the department to admire the operation conducted in the fields.

Director Eckart showed them first a field of seedlings planted last May which had done remarkably well. Some of the cane was of extraordinary growth and won the admiration of all. An adjoining lot of seedlings near by, from West India seed, was much inferior. Only one seedling had been propagated from Hawaiian seed and it had died.

From this party went all over the fields remarking on the comparative excellence of the different growth of cane.

An inspection of the apparatus in the department of Pathology and Physiology followed. Dr. N. A. Cobb doing the honors with lucid explanations.

Lunch was then served and this afternoon the association will hear the last of the reports on hand. Tonight they dine at the Young.

Some ideas of the number of matters treated by Dr. Cobb may be gathered from the fact that he treated 47 different diseases of plants. He also submitted samples of the following in jars as follows:

1. Rind Disease.
2. Pine-apple Disease.
3. Root Disease.
4. Schizophyllum Disease.
5. Bacterial Top Rot.
6. Toadstools Causing Diseases of Plantation Timber.
7. Under about 29 microscopes were shown the following preparations (See 2-3a).
8. The following apparatus and material was exhibited. (See 2a-2b).
9. Particular attention was paid to plants and photographs of machinery for the treatment of cane-cutting on a plantation scale.

TAXES MILITARY AND SCHOOLS

(Continued from page one.)

for their children, and were assured that these would be provided.

Governor Carter appeared to be favorably impressed with the visitors. One of them has been in America a year and speaks some English. Both have taken out their first papers as American citizens. In fact the men of the entire colony, of three or four hundred families, have taken out such papers.

lead the meeting assisted by Ensign Haines and Lieutenants McClelland and Jensen.

No Counsel Needed In This Case

SUPREME COURT REVERSES DECISION FOR A DEFENDANT WHO MADE NO APPEARANCE.

The Supreme Court gave a decision this morning reversing the Fifth Circuit Court in a case where that court's decision was not opposed by counsel. In the suit of Mary Charman and others against William Charman, the Circuit Court gave a decision in favor of plaintiffs, awarding them title to land on Kaula, and though there was no appearance for defendant on appeal, the court sets aside the decree.

Judge Hardy gave his decision without taking any evidence, on the pleadings in the case. The plaintiffs sued for lands alleged to be of the estate of George Charman, deceased, and set forth that defendant was claiming the lands. The defendant's answer did not claim the land, but set forth that it belonged to other parties. The judge then awarded the plaintiffs a decree, without taking any evidence. The Supreme Court, in an opinion by Justice Wilder, says:

"The circuit judge found in favor of the plaintiffs on the pleadings without taking any evidence. This was done apparently on the theory that defendant by his answer had disclaimed ownership in the land. However the answer may be regarded, it denies the title of plaintiffs, and, therefore, plaintiffs should have proved their title to the land before being decreed to be the owners. And the amended bill shows that defendant has an interest in the land in common with the plaintiffs. How then can it be held from the pleadings that defendant has no estate, right, title or interest in the land?"

"The decree appealed from is reversed and the cause is remanded to the circuit judge of the Fifth Circuit."

DAVID KAAPA DIED TODAY

FORMER POLICE DETECTIVE EXPIRES FROM COMPLICATION OF DISEASES.

David Kaapa the former police detective, died this morning at 10 o'clock at the corner of Vineyard and River streets. Blood poisoning and various complications were the cause of death. He had been ill for about a month.

David was about 55 years of age and according to the information obtainable today, was a native of Kona, Hawaii. He was in his prime; the best detective on the local police force especially for crimes committed by Chinese and natives. He had a thorough acquaintance with the various criminals of those races and always kept a close watch on them. His health had been failing for two years past and his work had not been up to his former standard. He left the force last July. The funeral will be held tomorrow.

TOO ROUGH FOR DREDGER TO WORK

BIG SWELL RUNNING AT THE BAR YESTERDAY—HARBOR IMPROVEMENT HAD TO STOP.

The weather has been so rough at the bar and in the channel that dredging operations have been suspended by the Reclamation. The dredger Pacific had to shift her position further inside of the harbor yesterday owing to the rough swell. There was a strong swell running off the harbor yesterday and it was soon found to be impossible for the dredger to work at the mouth on the bar. Work had to be stopped. An attempt was made to resume work last night but owing to the swell, the work could not be prosecuted.

The pontoons leading from the Pacific to the shore were in danger of being capsized by the swell, so the work had to be shifted to a more protected place yesterday. The Pacific is working today near the lighthouse.

WUNDEMBERG GARNISHEED.
Henry May & Company have served a garnishee on Fred Wundemberg in the matter of the suit against the Wai-kiki Seaside Hotel Company, in which judgment was secured and execution returned unsatisfied. It is claimed that the garnishee has \$1,000 to turn over to the defendant.

MIKAHALA DEPARTS TONIGHT.
The steamer Mikahala will not depart until midnight today for Kaula ports. She is being held to await the passengers who may attend the Planters banquet tonight.

ONOMEA HOLDS MEETING.
The annual meeting of the stockholders of Onomea Sugar Company was held this morning at the offices of C. Brewer & Company, Ltd. The reports of officers were read. Manager J. T. Mole made an estimate of the next season's crop of 11,400 tons. Last season's crop was 11,049 tons. The following were elected officers for the

RUSSIANS LEAVE FOR KAUAI

LAND COMMISSIONER PRATT WILL TAKE THEM TO INSPECT COLONY SITE.

Governor Carter had a meeting this morning with P. A. Demens and the two Russians who represent the colonists who want to come here. An appointment had been made for him at 9 o'clock, and at that hour the governor found them waiting for him. Land Commissioner Pratt was also present. The discussion lasted a long time and dealt with the prospects and terms which may be offered the laborers.

The two Russians are T. Shubin and M. Sloxiff, and they are characteristic specimens of their race, as far as face and whiskers go. Both are intelligent looking men, of sturdy build. They showed deep interest in all information they could secure about the islands. Though the weather they are experiencing is far from good, it is believed by those interested in the colony scheme that they will make a favorable impression on Kauai this evening. Land Commissioner Pratt and the Russians leave for Kauai this evening, to look at the land on which it is proposed to settle the colony.

GRACE SPRECKELS' MARRIAGE.
SAN FRANCISCO, November 15.—Miss Grace Spreckels has named her wedding day, and the marriage of Mr. and Mrs. John D. Spreckels' beautiful daughter to Alexander Hamilton will be celebrated in the quietest manner possible on Monday, the 27th of November. No guests outside of the two families are to be present and not even close friends will be bidden to this marriage of so much importance socially, yet to take place in such a quiet fashion. Neither bride nor groom-to-be cares in the least for society or display of any kind, and it is the wish of both Miss Spreckels and Mr. Hamilton that the affair take place with as little fuss as possible.

Liquid Veneer

"Makes Old Things New"

FURNITURE, PIANOS, FINE WOODWORK, CARRIAGES, AUTOMOBILES, BICYCLES. IT CLEANS, DISINFECTS AND VENEERS.

A piece of Cheesecloth moistened with LIQUID VENEER and passed over your furniture or woodwork will remove grease, dust, dirt, stains and all foreign matter, disinfecting and veneering at the same time.
